

MACHHAR INDUSTRIES LIMITED

DETAILS OF BUSINESS:-

Machhar Industries Limited was established in the year 2008 following the de-merger of Anil Chemicals & Industries Limited. We are a prominent public limited company, proudly promoted by the esteemed Machhar Group, a leading industrial house located in Aurangabad, Maharashtra. Our company operates with two distinct divisions: **The Chemical Division and The Automotive Division.**

The chemical division is involved in the production of Ammonium Nitrate, a key raw material for explosive industry. The automotive division is involved in manufacturing and distribution of AdBlue (also known as Diesel Exhaust Fluid - DEF).

We strive to deliver high-quality products that meet stringent industry standards, ensuring customer satisfaction and compliance with environmental regulations.

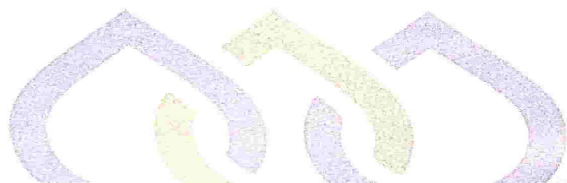

CHEMICAL DIVISION:-

The company is engaged in the manufacturing of various grades of Ammonium Nitrate, a major raw material used for manufacturing of industrial explosives. The manufacturing plant is located at GIDC industrial area, Panoli, near Ankleshwar, Gujarat. Ammonium Nitrate is also used directly as explosives substance by mixing it with fuel oil. This is the most cost effective product used by open cast mines for blasting. The present installed capacity of companies ammonium nitrate plant is 42000 tons per annum. The major raw material i.e. Ammonium Nitrate Melt is sourced from M/s. Gujarat Narmada Valley Fertilizers, Bharuch which is located just 30 km away from the factory. The major customers include Indian Oil Corporation Limited, Solar Industries Limited, Gulf Oil Corporation Limited and Orica Limited.

AUTOMOTIVE DIVISION:-

With the introduction of BS-IV & BS-VI emission standards by the Govt of India, all diesel vehicles with engine capacity of 2000 cc or more are equipped with equipped with SCR technology which helps in the reduction of NOx gases from the exhaust gas. For this technology to work, AdBlue® is to be added in vehicle. AdBlue®, commonly known as Diesel Exhaust Fluid is a blend of de-ionised water and technical grade urea.

The company has recently diversified into manufacturing of AdBlue® at a completed automated, state of the art, manufacturing unit at Chitegaon, Aurangabad. The company has launched AdBlue® under the brand name of YUNI BLUE. The Company is certified by Verband der Automobilindustrie -Germany, ISO 9001:2015, ISO 22241 & Bureau of Indian Standards IS 17042. The installed capacity of AdBlue® manufacturing is 60 lakh liters per annum.
